

## SIRIPORN INTRODUCES PUERARAGEL CREAM GEL FACIAL MOISTURIZER WITH PUERARAPREM™

Thank you for your purchase of Puerara-Gel Cream Gel moisturizer

Pueraragel Cream Gel formulation was designed to create a synergistic dynamic for sensuous beauty. We are working to hard earn your trust and confidence. We used the very highest quality ingredients in the production. Very little heat was used in the process. It is a slower and more arduous process to carry out but the results are worth it. Maintaining the biological integrity of the actives produces maximum efficacy and consequently the highest quality product. The cosmetic carriers are at the very lowest levels. PueraraGel cream gel is a thoughtful formula designed to exfoliate, reduce inflammation, support healthy collagen, increase microcirculation, anti-oxidant support and help protect chromosomes from environmental UV damage.

**PueraraPrem™** is the organically grown brand of Pueraria Mirifica we use in our products. It is unique for the following reasons: Plants from the wild from all over Thailand have been studied for close to 20 years. Only the highest quality plants with the most unique genetic profiles were selected for cultivation. Proprietary nutrient enrichment protocols have been studied and are still ongoing and implemented. Only the highest quality plants with the most unique genetic profiles were selected for cultivation. These cultivars have been moved to the most appropriate area of Thailand that supports the most ideal condi-

These factors along with a 7 to 10 year harvest cycle produce the very highest actives. The very potent chromene molecules (deoxymiroestrol, miroestrol) and secondary actives in Pueraraprem™ are critically important for a unique level of estrogenicity. The profound estrogenicity affords a pathway to luscious beauty.

**Papaya Extract** Is unique because it contains papain, a natural enzyme. Papain degrades dead skin...hence a unique natural exfoliator which works on the surface of the skin.

**Alpha Lipoic Acid** is ideal anti-inflammatory and anti-oxidant. It is a natural molecule that exists in every cell in the body. It is credited with reconstituting glutathione and vitamin C inside the cell.

**ULHA** is a special form of hyaluronic acid., a far more expensive form. The type in this product is 7000 to 10,000 Daltons. The molecule is much smaller than regular HA. This allows much deeper penetration into the skin.

**Mixed Tocopherols** have several functions in our formulation. Mixed Tocopherols are the natural form of vitamin E.; It is a broad spectrum vitamin E. It is a powerful anti-oxidant and preservative of oils. The biological activity is far superior to synthetic analogs.

**Caffeine** is a potent anti-inflammatory, increases microcirculation and studies also show support for UV damage to the chromosomes. Caffeine is a potent phosphodiesterase inhibitor helping to "smooth" the skin. Caffeine also has potent anti-oxidant properties.

*\* If you are taking Vitamin A as a supplement it is recommended that you reduce or eliminate usage while using this product. Too much vitamin A can cause undesired health issues or consult your physician.*
