

SIRIPORN INTRODUCES PUERARACARE-B WITH PUERARAPREM™

Thank you for your purchase of PueraraCare-B. The PueraraCare-B formulation was designed to create a synergistic dynamic for sensuous beauty. We are working to earn your trust and confidence. We used the very highest quality ingredients in the production of PueraraCare-B. Absolutely no heat was used in the process. It is a slower and more arduous process to carry out but the results are worth it. Maintaining the biological integrity of the actives produces maximum efficacy and consequently the highest quality product. This is an anhydrous formulation and natural product. Even the lipophilic carrier has active ingredient status. The cosmetic carriers are at the very lowest levels. PueraraCare-B is a potent formula for serious goal oriented women on a mission of accomplishment.

PueraraPrem™ is the organically grown brand of Pueraria Mirifica we use in our products. It is unique for the following reasons: Plants from the wild from all over Thailand have been studied for close to 20 years. Only the highest quality plants with the most unique genetic profiles were selected for cultivation. Proprietary nutrient enrichment protocols have been studied and are still ongoing and implemented. Only the highest quality plants with the most unique genetic profiles were selected for cultivation. These cultivars have been moved to the most appropriate area of Thailand that supports the most ideal conditions for Pueraria Mirifica farming.

These factors along with a 7 to 10 year harvest cycle produce the very highest actives. The very potent chromene molecules (deoxymiroestrol, miroestrol) and secondary actives in Pueraraprem™ are critically important for a unique level of estrogenicity. The profound estrogenicity affords a pathway to luscious beauty.

Cold Pressed Grape Seed Oil. We chose cold pressed grape seed oil despite the significant difference in cost vs other extraction techniques, Biological activity is maintained and not compromised by heat or chemicals. Grape seed oil is credited with cell membrane repair and superior barrier support. Some schools of thought credit grape seed oil with superior collagen support. Discover what European women have known for decades.

Retinol retinol penetrates deep into the dermis. It help support and stimulate the elastin cells. This contributes to the firming dynamic.

Alpha Lipoic Acid is ideal anti-inflammatory and anti-oxidant. It is a natural molecule that exists in every cell in the body. It is credited with reconstituting glutathione and vitamin C inside the cell.

Mixed Tocopherols have several functions in our formulation. Mixed Tocopherols are the natural form of vitamin E.; It is a broad spectrum vitamin E. It is a powerful anti-oxidant and preservative of oils. The biological activity is far superior to synthetic analogs.

Green Tea Extract (with EGCG) Green tea (with EGCG) extract is loaded with potent anti-oxidants called polyphenols and catechins. Epigallocatechin gallate (EGCG) in particular has been shown effective as an antioxidant. in repair of damage done by UVA.
